Thank you Barbara,

As you indicate below, we need to schedule monthly meeting for the October report. I propose next Tuesday, 19<sup>th</sup> at 9:00 am mountain. Does that work?

**Subject:** RCRA Pond UAO Weekly Report #170 - November 4 - November 10, 2013

Greg,

As you had directed, FMC is providing a weekly report, pursuant to the RCRA Pond UAO, describing field activities conducted pursuant to work plans you have approved.

Work Performed this week

- Continued implementation of the IWP and 7 day operation (80 hours per week; 12 hr/day Mon-Sat and 8 hrs on Sunday) of one GES unit at the east perimeter standpipe on Pond 18A, the relatively flat concentration trend continued and alternative GES operating scenarios will be evaluated if the trend changes.
- Continued continuous monitoring at three Pond 18A boundary locations during periods of gas extraction. There were no TWA or maximum values above the thresholds specified in the Air Monitoring Plan. A spreadsheet summarizing the results of this monitoring to date is attached.
- Other than continuous monitoring at Pond 18A, no monitoring was required or performed pursuant to the approved work plans during this reporting period.
- Submitted October monitoring data for the monthly report and awaited proposal from EPA for potential date(s) for conference call to review.

Problems Encountered:

None.

Unplanned Events Encountered:

None.

Work to be performed the following week:

- Continue implementation of the IWP and 80 hours per week operation of one GES unit at the east perimeter standpipe on Pond 18A.
- Continue continuous monitoring at three Pond 18A boundary locations during periods of gas extraction.
- Monitoring scheduled to be performed pursuant to the approved work plans during this week:
  - Pond 15S - Perimeter pipe monitoring and appurtenance monitoring
  - Pond 16S - Perimeter pipe monitoring appurtenance monitoring, and perimeter surface scan (weather permitting )
  - Pond 18A - Perimeter pipe monitoring, appurtenance monitoring, and perimeter surface scan (weather permitting)
- Await proposal from EPA for potential date(s) for conference call to review October monthly data.
